Hiro

Dear Hiro,

I am writing to express my strong interest in the Senior Software Engineer position at Hiro, as advertised on LinkedIn. The opportunity to contribute to building and scaling backend systems within the Bitcoin ecosystem is particularly exciting. My experience aligns well with your need for someone passionate about developer experiences.

My expertise in designing scalable backend microservices using Node.js and deploying on AWS, as demonstrated at Databricks, directly addresses your requirement for building and optimizing APIs and services. Furthermore, my experience refactoring front-ends with React and TypeScript at AWS, increasing feature delivery velocity by 40%, showcases my ability to improve developer experience and platform evolution. I am adept at infrastructure automation with Terraform, streamlining CI/CD pipelines, as the job description requires high agency and autonomy.

I am drawn to Hiro's commitment to fostering a supportive and inclusive culture within the Stacks ecosystem, empowering engineers to do their best work. I am eager to contribute to the strategic roadmap for the Hiro Platform and believe my passion for crafting reliable platforms aligns perfectly with your mission. I am confident I can significantly contribute to your team and would welcome the opportunity to discuss my qualifications further.

Sincerely,

Art Chen
